### BE CAREFULL ON OUR LAKES - THICKNESS OF ICE -

Estérel, January 9, 2019 – We urge you to be prudent when skating, skiing, snowshoeing and snowmobiling on our lakes. The thickness of the ice can vary from place to place and from time to time. This is especially true **under bridges**.

The *Ministère de la Sécurité publique* recommend to never to adventure out over ice less than 10 cm (4 inches) thick. For a snowmobile with 2 persons, the ice should be at least 15 cm (6 inches) thick.
